The Esri Small Utility Enterprise Agreement (EA) is a three-year agreement that will grant your organization access to Esri term license software including maintenance on all software offered through the EA for the duration of the agreement. The EA will be effective on the date executed and requires a firm, three-year commitment.

Based on Esri's work with utility organizations worldwide, we know there is significant potential to further apply geographic information system technology in many operational and technical areas within your organization. For this reason, we believe Trenton Water Works will greatly benefit from an Enterprise Agreement. A quote with further details can be found in the Appendix.
